

Alpine Natural Gas's biggest threat to our gas distribution system is pipeline dig-ins. In 2022 Alpine had four homeowners dig into our gas service lines. We understand spring is a time for many of our customers to perform projects around their home. We want to take this time to remind you of the free service of calling **811** at least two days before you start any project such as Planting trees, installing fence posts, or any other project that requires you to dig below the surface. Please help us keep everyone safe and call:

Know what's below.
Call before you dig.

CALL 811 BEFORE YOU DIG 800-227-2600/811

Call before you dig (**811**) **UNDERGROUND SERVICE ALERT**, it is a free call. It is also the law to call before any digging has begun. An underground gas line is installed on your property, and you *must* call this number prior to any excavation on your premises. Calling 811 allows Alpine to safely locate and Mark its underground piping so that any excavation can be performed safely.
